h. State / Private / Other lands involved? ☒ Yes ☐ No

**9. Statement of Project Goals and Objectives:** Improve forest health, reduce catastrophic fire risks

Contain and control noxious weeds over a large area of the Klamath Falls Resource area.

**10. Project Description:** (Provide concise description of project and attach map.)

Noxious weeds continue to pose a significant threat to land values, livestock forage availability and quality, and fish and wildlife habitats. Because of the checkerboard ownership patterns within the O&C lands, a cooperative approach between BLM, USFS, Klamath County, ODA, US Timberlands, and other private land owners is essential. This project would increase our ability to contain and perhaps even control noxious weeds over a large area of the Klamath Falls Resource area.

**Title II Project Application**  
**Medford District Resource Advisory Committee**

**11. Coordination of this project with other related project(s) on adjacent lands?**

☒ Yes    ☐ No    If yes, then describe.

The BLM has an ongoing program to use integrated weed management methods to treat noxious weed populations on its lands. Treatments (chemical, manual, biological) are conducted by a crew employed by ODA through a contract with BLM. Both the Winema and Fremont National Forests contact with Klamath County to treat noxious weeds on national forest lands. The USFWS and BOR treat noxious weeds on lands administered by those agencies

**12. How does proposed project meet purposes of the Legislation?** [Sec. 203(b)(1)]

- ☐ Improves maintenance of existing infrastructure. [Sec. 2(b)]
- ☒ Implements stewardship objectives that enhance forest ecosystems. [Sec. 2(b)]
- ☒ Restores and improves land health. [Sec. 2(b)]
- ☐ Restores water quality. [Sec. 2(b)]

**Title II Project Application**  
**Medford District Resource Advisory Committee**

**17. How will cooperative relationships among people that use federal lands be improved?** [Sec. 2(b)(3)]

Cooperative relationships and channels of communication will be established in order to coordinated noxious weed management. These relationships and channels can be used to facilitate the implementation of other cooperative projects.

**18. How is this project in the best public interest?** [Sec. 203(b)(7)] **Identify benefits to communities?**

Containment or control of noxious weed populations will decrease the potential for these species to spread to adjacent lands and degrade economic value, recreation potential, and wildlife habitat. In turn, productivity and economic value will increase, recreational activities will increase, and wildlife habitat will improve on lands where noxious weeds are contained or controlled

**19. How does project benefit federal lands/resources?**

The containment and control of noxious weeds will improve wildlife habitat, increase the potential for recreational activities, increase and improve forage for livestock and wildlife, and decrease the potential for invasion of federal land, by noxious weeds from adjacent land owners. These effects will better enable federal land managers accomplish their objectives for economic activities on federal lands, management of wildlife habitat, management of special status species and their habitat, and provision of quality recreational activities to the public.

**39. Monitoring Plan (Sec.203(b)(6))**

- a. What measures or evaluations will be made to determine how well the proposed project meets the desired ecological conditions? [Sec. 203(b)(6)] Who will be responsible for this monitoring item?**

Post treatment monitoring of selected sites for treatment effects and non-target effects can be used to evaluate the success of the noxious weed control project. The various land owners/managers will be responsible for this monitoring.

- b. How will the project be evaluated to determine how well the proposed project contributes towards local employment and/or training opportunities, including summer youth jobs programs such as the Youth Conservation Corps? [Sec. 203(b)(6)] Who will be responsible for this monitoring item? We plan to contract with Klamath County for weed treatment. Klamath county would look at this additional workload and hire or subcontract accordingly.**

- c. What methods and measures of evaluation will be established to determine how well the proposed project improves the use of, or added value to, any products removed from National Forest System lands consistent with the purposes of this Act? [Sec. 203(b)(6) and Sec. 204(e)(3)] Who will be responsible for this monitoring item?**

- d. Identify total funding needed to carry out specified monitoring tasks (Table 1, Item 33)**
